

Creating and editing a course

Here you can see all the configuration settings available for a course. This same configuration page is used for both creating a new course and editing an existing one.

Most of them are self-explaining, we will provide descriptions and details where needed:

Main course information

🔗 🖼️ Paragraph 11pt

📏 A A 😊

0 WORDS

Selected Category: shows the selected category for the course. Can be changed upon course edit.

Code: enter an alphanumeric code that will help you identify different versions or releases of courses with similar titles, or to integrate course features with other applications.

Course Type: Select the course type:

1. Elearning: standard elearning course
2. Classroom: course with editions and classroom management
3. Elearning with editions: course with edition management

Course Status: Select the status for this course:

1. Under Construction: the course is only accessible to the users responsible for preparing its content (normally teachers, tutors, mentors and/or administrators);
2. Confirmed/ Available: the course is accessible to the users. Confirmed is meant to be used for classroom courses, available is meant for elearning courses
3. Concluded: the course is finished and only those users who have concluded it have access;
4. Cancelled: the course is no longer accessible, and registration from the course catalog is no longer possible.

Directly play the first object: when clicking on the course “enter” button, the first LO will be automatically opened. Don't use this option if you have more than one LO, because it would be impossible to play the following LO's

Course Box Description: enter the text to be displayed in the “my Courses” boxes. You can also insert a link, provided you write it with the appropriate HTML Code

course box description (max length text area 120)

total chars: 46

```
<a href="https://www.google.com">click here!</a>
```

The description will then be displayed on the My Courses page and in the Catalog

Description: full description that can be shown in the “course info” module, or inserted in certificate templates with a tag.

Details

Difficulty

Medium ▾

Credits

0

Labels

Not assigned ▾

Assign the menu: choose the menu template to be used in this course. If you don't select any different menu, the default one (i.e., the first in alphabetical order) will be used.

Course Language: Define the language used for course materials. This option will be useful to filter or select courses by language in catalogs, enrollment policies, administrator assignments

Difficulty: label to describe course difficulty level

Credits: credits assigned by this course, to be shown in reports and calculated through the “time period” option

Labels: assign a label to group courses with the “label” feature

Course Subscription

— Course subscription ▼

Enrollment policy

- ☐ Only admin
- ☐ On approval
- ☒ Free

Can the user subscribe?

- ☐ Subscriptions are closed
- ☒ Subscriptions are open
- ☐ Subscription is available during the following period:

From:

To:

Auto - unsubscribe

- ☒ Only admin
- ☐ On approval
- ☐ Free

☐ Unsubscribe date limit

Code for the automatic subscription to a course

☐ Generate random code for self-registration

☐ Sell course

Price

Advance payment

Free: the course will be displayed on the “catalog” page, and the user will have the possibility of self-enrolling

On approval: the course will be displayed on the “catalog” page, and the user will have the possibility of self-enrolling. The request will have to be approved by a manager (an admin)

Only admin: the course will be displayed on the “catalog” page, but only admins will have the possibility of enrolling users.

It might make sense to describe those options in the course description, for instance, writing “ask your manager to enroll you”.

Code for automatic subscription: lets users self register to this course, entering this code upon registration or through the code field in the userpanel

Sell course: enable this course for ecommerce features

Display mode options

The following options will let you define some aspects related to course visualization and layout elements:

— Display mode options ▼

Show course to:

- ☒ Everyone, and show on home page
- ☐ Only for logged in users
- ☐ Only users subscribed to the course

Show on course interface

- ☒ Show progress
- ☒ Show time
- ☐ Advanced course info

Users online in this course

Show only number of connected user ▼

Select levels of users shown on information course page

- ☐ Administrator
- ☐ Instructor
- ☐ Mentor
- ☐ Tutor
- ☐ Student
- ☐ Ghost
- ☐ Guest

Deny access to this course if the user status is

- ☐ Subscribed
- ☐ In progress
- ☐ Completed
- ☒ Suspended

The above section describes the course visibility options. Any course can be displayed or not to users who are not yet enrolled.

Please also see the reference guide on [Catalogs](#) to learn how you can use catalogs, combining them with the displaying options.

Time options

In this section, you can configure options related to course scheduling and duration

— Time options ▾

Date begin	<input type="text"/>
Date end	<input type="text"/>
Starting hour	<input type="text" value="--"/> ▾ : <input type="text" value="--"/> ▾
Ending hour	<input type="text" value="--"/> ▾ : <input type="text" value="--"/> ▾
Days of validity	<input type="text" value="0"/>
Average time for course	<input type="text" value="0"/>

Days of validity: course will be available to user only for the number of days defined in these fields. Time is calculated based on the date of user first access to the course.

Note: When “days of validity” is set, the course closing date shown in the course boxes on the “My Courses” page will be dynamically calculated based on each user's first access date. If closing date is set and is prior than the user calculated end date, it will be displayed instead.

Average time for course: estimated time for course fruition. It doesn't affect the user's stats, but can be used in course info and in reports.

Special Options

— Special options ▾

Minimum number of subscription (0 = unlimited)	<input type="text" value="0"/>
Max number of subscriptions	<input type="text" value="0"/>
<input type="checkbox"/> Allow overbooking	
Assign disk space limit to this course (MB)	<input type="text"/>
<input type="checkbox"/> Inherit disk quota from standard settings	

Max number of subscriptions: once the limit is reached, course subscriptions by users will be blocked

Allow overbooking: once the max-subscription limit is reached, users will still be able to enroll to the course and put in a waiting list

☒ Show course logo in course list

Banners are only shown in specific settings (i.e., with one of our plugins). The **course logo** should be 400 × 140 pixels.

Demo material can be anything you want, and it will be displayed in the My Courses page as well as in the Catalog, like this

When you click on the three dots, you will see a clickable link allowing you to download whatever demo material you have uploaded.
