

# Editions

## Overview

In Forma, the idea behind editions is to have many separate issues of the same master course, with different start/end date and subscription groups.

All the editions of a course will inherit and share some features from the Master course:

- Course Menu
- Course Materials
- Logo and general configuration
- Certificates

To create a course with editions, you can select the desired course type upon course creation.

### IMPORTANT:

Do not convert an existing elearning course to editions: it won't be possible to manage the original subscribers that weren't associated to any edition

## Add and Manage Editions

Click on the “editions” column in course management to add and configure your editions

# Elearning Editions

You can use Elearning Editions to manage recurrent elearning or assessment courses requiring a start/end date and separate subscription

All the editions will share the same course materials, configuration, and certificate template.

# Classroom Courses

Classroom courses extend the elearning courses with the ability so define for each edition:

- Different dates and classroom schedule
- locations

- attendance

# Dates Settings

First, in the edition configuration, select one or multiple dates for the classroom lessons:

## Calendar classroom edition

The calendar interface displays three months: June 2020, July 2020, and August 2020. Each month is represented by a grid of days. In June 2020, the 18th is highlighted with a black border. In July 2020, the 24th and 31st are highlighted in blue. In August 2020, the 7th is highlighted in blue. Navigation arrows are present at the top of each month's grid.

Then in following page you will be asked to set for each date:

- Lesson hours
- Classroom Location

Course > Classroom > Edit: Leadership Program - London (24-07-2020 09:00)
