Manage Menu

This module is generally assigned only to course administrators, with view and edit permissions, and located under

Teacher Area > Manage Menu

This module will let you:

- Add new modules to your course
- Edit menu item names
- Change module permissions

Changes made here will affect only the present course specific menu, and won't reflect on general menu templates or any other course: this will give you maximum flexibility with menu management and customization.

If you need to apply changes to several courses, consider assigning or creating a menu template from general administration, or ask a god admin to do that.

Please refer to the general menu management feature for details.
