Newsletter (Course)

This module allows course managers (i.e., administrators, teachers, courses) to mass-email users subscribed to subscribed users.

Features:

- Define the sender, the subject, and the message of the communication.
- One or more attachments may be included in the newsletter.
- Select all or some users

It is also possible to choose which users to send the communication to based on the language in which the platform is configured.

The communication can be sent either by e-mail or SMS (when this service is managed by the platform).
