

How to configure the Glossary L.O.

Creation of the Glossary in a course

Go to Front end, click on “My courses” and click on the course title. For example, we will click on the title of the course, “Excel”.

To configure the material, click on the menu item “Teachers Area / Learning Objects Management / Course Objects”

In the right part of the screen, there are all the icons that allow the different configurations.

Edit icon

By clicking on the “edit” icon it is possible to set most of the configurations of the learning object.

We remind you that to insert the Glossary within the course, it is necessary to click on the menu item “Teachers Area / Learning Object Management / Course Objects” and click on “New Learning Object” and check the Glossary

 [Aggiungi un termine](#)

Add a new term and edit an existing term

Now let's see how to insert a new term. Click on the “Add a term” button.
In the screen below, we must enter the term description and its description.
