

# How to create a classroom course with editions

When it is necessary?

In the event that there is a need to create multiple editions for a single course, for example because a classroom course takes place in different cities and on different dates. How should we proceed?

## Classroom course creation

To access the course management, click on the menu Elearning> Courses> Courses

Corso

The screenshot shows a web application for course management. At the top, there's a section titled 'Corso'. Below it, a list of categories is shown, with 'A SERVIZI' selected. A red circle with the number '1' highlights this category. Below the categories, a list of courses is displayed. A red circle with the number '2' highlights the 'TESTING' course. To the right of the course list, there are filters for 'Classe', 'Tutti i discendenti', and 'Utenti in attesa'. A red circle with the number '3' highlights the 'Classe' filter. Below the filters, there's a table with columns: 'Codice', 'Nome', 'Tipo', 'Studenti', 'In attesa', and several icons. A red circle with the number '4' highlights the 'In attesa' column. The table shows two rows: 'TESTING' and 'Testing di abuso di alcool'.

Codice	Nome	Tipo	Studenti	In attesa	Icone

## Method of course completion

The method of course completion can be defined from the drop-down menu:

**Punteggio finale**

Test via web

- web test (i.e., enter a test on the platform, and it will be the test for completing the course)
- test on paper (it's just a label, inserting “on paper” means you'll do it offline).
- No test

So, the course completion occurs when the user performs a test on the platform (which must be an end-of-course marker at the end of the course) or manually when the administrator acknowledges the actual presence in the classroom, see paragraph 4).

## Start and end times

Click the “Next” button, and set the start and end times of each classroom day (optional):

In the “Class” column, you can set the classroom in which the course will be held.

The classrooms are set up from Elearning> Locations (the location, for example the city) and then adding “classes” (the actual classroom).

## Enroll the students

To enroll students in a course edition, access the enrollment management page (2):

Corso > Classe > Classe demo

From this page, you can:

1. Quickly enroll a single user by entering their username
2. Sign up more users by clicking on the “add” link, which will open a page for selecting individual users or entire organization chart nodes
3. Search among registered users
4. Remove a user's enrollment in a course (red “X” icon)

# Attendance management and classroom register printing

At the end of a classroom day, the teacher can access the online attendance register by clicking on the appropriate link (1)

Select the users who were actually present in the classroom on each day.

It is also possible to export the attendance sheet to Excel by clicking on the appropriate button

**NB:** You can select / deselect all users using the appropriate checkboxes located above each column (select / deselect all users on the same day), and at the end of each row (select / deselect a user on all days of a course)
