

# How to create an elearning course with editions

## Create an elearning course with editions

You may find yourself in the situation where you want an elearning course to have different start and end dates depending on the group of users who use the course. For example, you may wish that a group of users, called Group A, takes the course from April 1 to April 30 (after which it will no longer be possible to access it) and that Group B can take the same course from May 1 to 31 May. How to achieve this? Do I need to create two courses with different start and end dates? Not necessarily, you can also create a master course and the various editions related to it, each with a different period of use. Let's see how.

## First step: Creation of the master course

Go to Administration / E-learning / E-learning / Course

dev.formalms.org/dev/appCore/

 Psicologia

 Nuova categoria

 Nuovo  Iscrizioni multiple

To find out how to configure the course, refer to the tutorial “How to create a course”.

Pay attention to the central part of the screen, specifically in setting the opening or closing of the registrations or in setting a period in which the user can register.

The period of time available to register must in fact take into account the periods available to be able to register for each individual edition.

For example, in case the course includes:

- A first edition for the month of April (from 1 to 30 April)
- A second edition for the month of May (from 1 to 30 May)

Consequently, the enrollment period of the master course must start, at a minimum, from April 1, 2014, or you can leave the field blank.

**Iscrizione Al Corso** ▾

**Politiche di iscrizione**

☐ Solo admin

☐ Su approvazione

☒ Libera

**L'utente può disiscriversi?**

☐ Le iscrizioni sono chiuse

☒ Le iscrizioni sono aperte

☐ L'iscrizione è disponibile nel seguente periodo:

**Dal:**  

**Al:**  

**Autodisiscrizione**

☒ Solo admin

☐ Su approvazione

☐ Libera

☐ Data massima di autodisiscrizione  

**Codice per l'iscrizione automatica ad un corso**

☐ Genera codici random per l'autoregistrazione

☐ Vendi corso

**Prezzo**

**% di pagamento anticipato**

---

Additionally, the “Time options” section allows you to set the start date and the end date of the course. In this case, too, to set the start date and the end date of the course, it is necessary to consider all the editions' dates. For example, in case the course includes:

- A first edition in April
- A second edition in May

Consequently:

the course start date will be April 1, 2014

the end date of the course will be 30 May 2014

Or you can leave the field empty.

Once the data has been entered, remember to click on the “Save changes” button

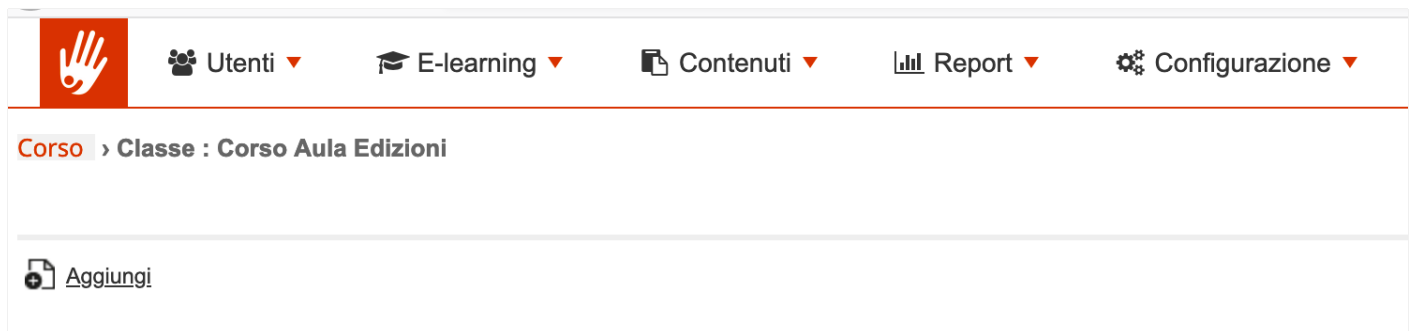

# Second Step: Creation of editions

In order to assign editions to the newly created course, you need to click on the edition number.

Codice	Nome	Tipo	Studenti	In attesa	Icone
01	Corso aula a edizioni	Classe	3	2	[Icone]
	Corso con un titolo davvero molto molto luvuuungo per provare il layout	E-Learning	9	9	[Icone]
01	Corso elearning a edizioni	E-Learning		0	[Icone]
01	corso richiesta approvazione iscrizione	E-Learning	2	2	[Icone]
001	Corso Test per notifiche	E-Learning	0	0	[Icone]
	demo Amnesty	E-Learning	0	2	[Icone]

To insert a new edition, click on the “Add” button

Corso > Classe : Corso Aula Edizioni

 [Aggiungi](#)

## Edition configuration

At this point we must configure the first edition. Following our example, the April edition.

It will be noted that among the various options, we can establish the maximum number of participants (and decide whether to accept overbooking). It can be noted that in the part relating to the dates, the enrollment period must be entered or the period of time in which the learners can register for the April edition (which obviously must be earlier than the available period of the edition) and the starting and closing day of the edition. Once the data has been entered, click on the “Save changes” button

Codice 02

Nome Edizione Aprile

Descrizione

Path: Words:0

Stato Confermato

numero massimo iscritti 0

Numero minimo di iscrizioni (0 = illimitati) 0

Prezzo

Data di inizio 01-04-2014

Data di completamento 31-03-2014

Consenti l'overbooking ☐

Le iscrizioni sono aperte ☒

Dal 01-03-2014

Al 31-03-2014

The same procedure must be followed to create the May edition

Codice 01

Nome Edizione Maggio

Descrizione

Path: Words:0

Stato Confermato

numero massimo iscritti 0

Numero minimo di iscrizioni (0 = illimitati) 0

Prezzo

Data di inizio 01-05-2014

Data di completamento 31-05-2014

Consenti l'overbooking ☐

Le iscrizioni sono aperte ☒

Dal 01-03-2014

Al 30-04-2014

At this point our master course and the associated editions are created.

# User registration

As far as enrollments are concerned, we could proceed to enroll users either with the “by admin only” option (see tutorial “How to enroll users to courses”) and enroll them to the group that will

have to follow the April or May edition or, always following our example, the enrollment will be free therefore the user, entered the platform, will view the course in the list of courses and will have to click on the “Enroll” button

At that point, he will only have to choose the edition to subscribe to.

The screenshot shows a dialog box titled "Iscrivi" with a close button (X) in the top right corner. It contains two sections for course editions. The first section is for "Edizione Maggio" with code "01", start date "01-05-2014", and completion date "31-05-2014". The second section is for "Edizione Aprile" with code "02", start date "01-04-2014", and completion date "31-03-2014". Each section has an "Iscrivi" button highlighted with an orange box. At the bottom right, there is an "Annulla" button. The dialog is set against a dark background with a "[01]" label at the bottom left.

Nome	Codice	Data di inizio	Data di completamento	Azione
Edizione Maggio	01	01-05-2014	31-05-2014	Iscrivi
Edizione Aprile	02	01-04-2014	31-03-2014	Iscrivi
